# AT A GLANCE

Oricus Semicon Solutions is an innovative Semiconductor Tools manufacturing company who, with almost 100 years of collective expertise, craft high tech bespoke tooling solutions for the global Semiconductor Assembly and Test industry.

From one-off customised products to large scale production, our R&D strength, precision manufacturing experience and problem-solving capabilities are impeccable. With a passion for engineering and customer oriented service, we deliver price competitive precision Semiconductor Tooling solutions to a global market with a local presence.

Oricus is made up of a global network of professionals with strong commitment and passion for our work. The company is managed and operated with a spirit of professionalism based on the foundation of integrity, equality and respect. We are determined, objective with a sense of ownership to deliver on our goals. We value our values, professionalism, passion, perseverance and our relentless pursuit to deliver value for our customers.

## Oriented to Customer's needs

We excel at creating specials – one of a kind pieces, with one of a kind craftsmanship combining with the latest in manufacturing technology to produce micro precision tooling. Oricus can Design and Manufacture either one-offs or high volume orders to your unique specifications, from High Temperature resistant tools for Power Devices to tools with complex geometries for 3D Advanced Packaging.

## Industry Leading Solutions

Our Technical Sales Consultants and R&D teams of seasoned Semiconductor Assembly and Test industry professionals will study your chip and package requirements and offer effective and competitive tooling solutions that will work right out of the box. Oricus has the solution to your tooling requirements. Leave it to us and you can focus on your key processes.

## Research and Development

R&D is the cornerstone of our commitment to deliver market leading tooling solutions. Our Material Science know-how, coupled with our Manufacturing Expertise and knowledge on the latest demands of Integrated Circuits Packaging allow us to offer tools that maximizes productivity and minimizes downtime.

# Die Attach

# Holding Systems

## Anvil Blocks

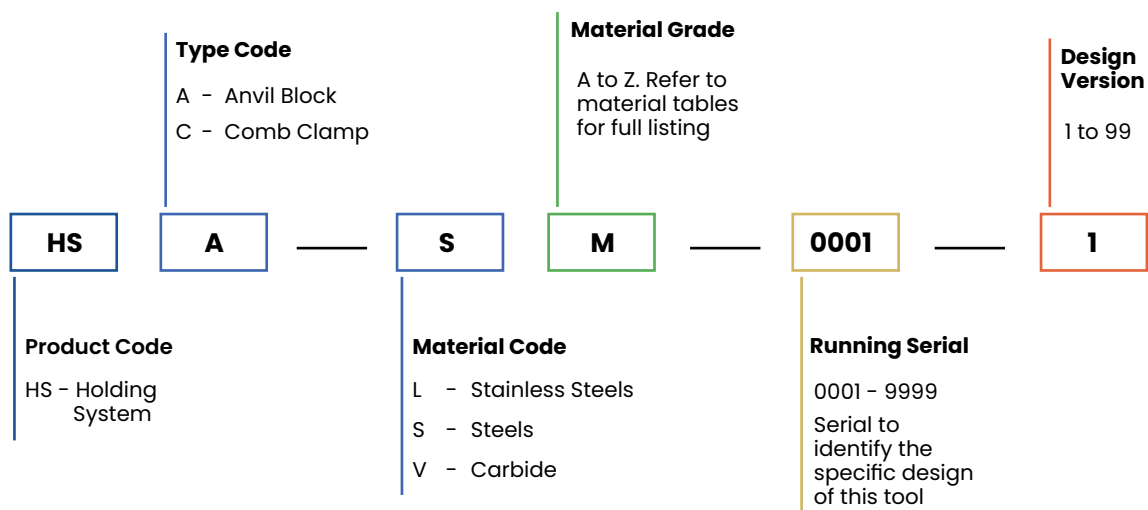

Anvil Blocks fully customizable to the pad size and pitch of your leadframe or substrate

## Comb Clamps

Comb Clamps are designed according to the layout of the leads or dam bar of your application.

## Part Numbers And Ordering

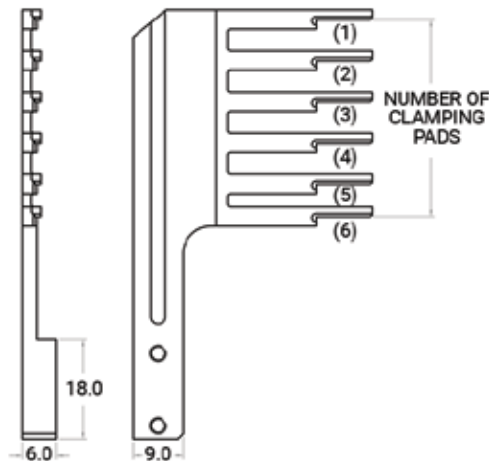

# Comb Clamps

Comb Clamps are used for clamping the leadframe or substrate firmly onto the Anvil Block during the Die Attach process. The function of the combs of each jaw for securing the leads or dam bar of the leadframe. The Comb Clamps are used in addition to vacuum suction on the Anvil Block for an added layer of security especially for critical packages.

Oricus manufactures Comb Clamps to fit a wide range of machines from OEMs such as Datacon, ESEC, ASM, Canon Bestem, Hitachi/Fasford, MRSI and more.

## Features

- Can be designed and adapted for use in a wide range of Die Attach machines.
- Available in various Superalloy, Stainless Steel and Tool Steel grades that are suitable for Cleanroom environments
- Clamping width of each comb jaw are machined to exacting tolerances to ensure the leadframe and substrate are held firmly onto the Anvil Block

## Benefits

- Our Comb Clamps are manufactured for a perfect fit to your specific application and equipment
- Plug-and-Play installation that reduces waste and minimizes set up time
- Allows for uniform clamping force to be applied on the lead fingers, dam bar or substrate to ensure stability throughout the entire Epoxy Dispensing and Die Attach process.

Part Number	Number of Clamping Pads
HSC-LE-0001-01	6
HSC-LE-0001-02	8
HSC-LE-0001-03	2
HSC-LE-0001-04	5
HSC-LE-0001-05	7
HSC-LE-0001-06	6

#### ESD Properties

Conductive <math>10^5 \Omega</math>

#### Applications

Standard Die Attach  
Flip Chip  
2.5D/3D  
Wafer Level Packaging  
Panel Level Packaging  
System in a Package

#### Comb Clamp Material

Superalloy  
Stainless Steels  
Tool Steels

#### Customization

Clamping pads profile

# MATERIALS

Oricus's extensive line of engineered materials specially developed and selected to offer optimal tooling performance for your specific Semiconductor Backend process. Our in-house materials are closely developed in partnership with Original Equipment Manufacturers with input from our customers. For externally procured materials, each material goes through a rigorous Quality Assurance and Performance Assessment programme before making it into our material list.

Oricus' in depth understanding and experience of materials allows us to formulate tooling solutions that work for you. As part of our value proposition, we study the conditions of your application and suggest the most appropriate material that meets your needs.
