# AT A GLANCE

Oricus Semicon Solutions is an innovative Semiconductor Tools manufacturing company who, with almost 100 years of collective expertise, craft high tech bespoke tooling solutions for the global Semiconductor Assembly and Test industry.

From one-off customised products to large scale production, our R&D strength, precision manufacturing experience and problem-solving capabilities are impeccable. With a passion for engineering and customer oriented service, we deliver price competitive precision Semiconductor Tooling solutions to a global market with a local presence.

Oricus is made up of a global network of professionals with strong commitment and passion for our work. The company is managed and operated with a spirit of professionalism based on the foundation of integrity, equality and respect. We are determined, objective with a sense of ownership to deliver on our goals. We value our values, professionalism, passion, perseverance and our relentless pursuit to deliver value for our customers.

## Oriented to Customer's needs

We excel at creating specials – one of a kind pieces, with one of a kind craftsmanship combining with the latest in manufacturing technology to produce micro precision tooling. Oricus can Design and Manufacture either one-offs or high volume orders to your unique specifications, from High Temperature resistant tools for Power Devices to tools with complex geometries for 3D Advanced Packaging.

## Industry Leading Solutions

Our Technical Sales Consultants and R&D teams of seasoned Semiconductor Assembly and Test industry professionals will study your chip and package requirements and offer effective and competitive tooling solutions that will work right out of the box. Oricus has the solution to your tooling requirements. Leave it to us and you can focus on your key processes.

## Research and Development

R&D is the cornerstone of our commitment to deliver market leading tooling solutions. Our Material Science know-how, coupled with our Manufacturing Expertise and knowledge on the latest demands of Integrated Circuits Packaging allow us to offer tools that maximizes productivity and minimizes downtime.

# Die Attach

# Rubber Holders

## Common Holders

Our most versatile range of holders that comes with precise geometries that fits Flat Tips, Vacuum Relief Tips, Groove Tips and Contact Tips.

## Tri-Lock Holders

Features our 3-point contact technology for secure fitment. Special profile to keep vacuum forces enclosed within the tool for optimal suction strength.

## Magnetic Holders

Tip manufactured with an encapsulated magnet that allows for speedy, fuss-free installation while maintaining superior fitment and alignment.

## Compression Holders

4 precision controlled sidewalls to secure the outer perimeter of the tip. Reduces overall assembled tool footprint without the need for holder-tip assembly.

## Spring-Loaded Holders

Our Spring-loaded holders feature our unique Spring Holding mechanism to ensure that the holders comply strictly with the spring force requirements of your application, even after continuous use.

## Part Numbers And Ordering

# Compression Holders

Compression holders are designed to reduce the size footprint of the assembled tips and holders while offering the same functionality of other holder designs. Compression holders together with compatible tips from our Rubber Tip product line are a popular choice for applications where a small tool footprint is desired due to certain tool size related process limitations.

The design features 4 precision tolerance controlled sidewalls to secure the outer perimeter of the tip. As compared to our Traditional or Tri-Lock holder designs, this design does not require the insertion of the holder into the tip, which greatly reduces the overall footprint of the assembled tool.

Oricus manufactures a wide range of holders to fit various machines from OEMs such as Datacon, ESEC, ASM, Canon Bestem, Hitachi/Fasford, MRSI, and more. If you require a holder for your machine shank that is not in our standard holder list, get in touch with us and we can customize one for you.

## Features

- Suitable for use in Die Bonders, Flip-Chip, Die Sorters and Surface Mount Technology (SMT) machines
- Available in various Stainless Steel grades that are suitable for use in Cleanroom environments
- Each holder will be customized to fit the tip it is holding
- Offers the smallest assembled tool footprint of all our holder designs

## Benefits

- Easy Plug-and-Play assembly of the Rubber Tips into the holders, with minimal risk of damage to the important tip surface
- The small footprint makes this the best tool configuration for processes or applications with Pick Up or Placement space limitations
- Does not compromise on bond force or bond flatness even with a reduced footprint

Part Number	X (mm)	Y (mm)
HRP-LJ-DA01-01	6.00	6.00
HRP-LJ-DA01-02	9.00	12.00
HRP-LJ-DA01-03	10.00	10.00
HRP-LJ-DA01-04	12.00	16.00

**ESD Properties**

Conductive < 10<sup>5</sup> Ω

**Holder Material**

Aluminium  
Steel  
Stainless Steel

**Rubber Tip Compatibility**

Flat Tips  
Vacuum Relief Tips  
Groove Tips  
Matrix Tips  
Side Contact Tips

# MATERIALS

Oricus's extensive line of engineered materials specially developed and selected to offer optimal tooling performance for your specific Semiconductor Backend process. Our in-house materials are closely developed in partnership with Original Equipment Manufacturers with input from our customers. For externally procured materials, each material goes through a rigorous Quality Assurance and Performance Assessment programme before making it into our material list.

Oricus' in depth understanding and experience of materials allows us to formulate tooling solutions that work for you. As part of our value proposition, we study the conditions of your application and suggest the most appropriate material that meets your needs.
